

Interreg NEXT Programme Poland–Ukraine 2021-2027

## **Projects' indicators**

November 2022

## Table of contents

<b>1. INTRODUCTION</b> .....	4
<b>2. PROGRAMME LOGFRAME</b> .....	5
<b>3. PROGRAMME INDICATORS</b> .....	10
<b>a. Output indicators</b> .....	10
RCO24 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against natural disasters.....	10
RCO30 Length of new or upgraded pipes for the distribution systems of public water supply .....	10
RCO31 Length of new or upgraded pipes for the public network for collection of waste water .....	10
RCO37 Surface of Natura 2000 sites covered by protection and restoration measures .....	11
RCO58 Dedicated cycling infrastructure supported.....	11
RCO69 Capacity of new or modernised health care facilities .....	11
RCO77 Number of cultural and tourism sites supported .....	12
RCO81 Participations in joint actions across borders .....	12
RCO83 Strategies and action plans jointly developed.....	12
RCO85 Participations in joint training schemes .....	13
RCO87 Organisations cooperating across borders.....	13
RCO115 Public events across borders jointly organised .....	14
RCO116 Jointly developed solutions .....	14
<b>b. Result indicators</b> .....	14
RCR36 Population benefiting from wildfire protection measures .....	14
RCR37 Population benefiting from protection measures against climate related natural disaster (other than flood and wildfires) .....	15
RCR41 Population connected to improved public water supply.....	15
RCR42 Population connected to at least secondary public waste water treatment .....	15
RCR73 Annual users of new or modernised health care facilities .....	16
RCR77 Visitors of cultural and tourism sites supported.....	16
RCR79 Joint strategies and action plans taken up by organisations .....	16
RCR81 Completions of joint training schemes .....	17
RCR84 Organisations cooperating across borders after project completion.....	17
RCR85 Participations in joint actions across borders after project completion .....	18
RCR104 Solutions taken up or up-scaled by organisations .....	18
<b>4. ADDITIONAL INDICATORS</b> .....	19
<b>a. Output indicators</b> .....	19
RCO14 Public institutions supported to develop digital services, products and processes .....	19
RCO25 River bank and lakeshore flood protection newly built or consolidated .....	19
RCO26 Green infrastructure built or upgraded for adaptation to climate change.....	19
RCO27 National and sub-national strategies addressing climate change adaptation .....	20
RCO28 Area covered by protection measures against wildfires .....	20
RCO36 Green infrastructure supported for other purposes than adaptation to climate change .....	20
RCO39 Area covered by systems for monitoring air pollution installed .....	21
RCO80 Community-led local development strategies supported.....	22
RCO121 Area covered by protection measures against climate related natural disasters (other than floods and wildfire) .....	22
RCO122 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against non-climate related natural risks and risks related to human activities .....	22
PLRO008 Number of entities supported in the development of digital services, products and processes.....	23

PLRO010	Number of entities that published public sector information/private data on-line .....	23
PLRO041	Number of units of rescue services equipped with rescue and disaster recovery equipment 24	
PLRO042	Number of purchased fire trucks equipped with rescue and disaster recovery equipment.	24
PLRO050	Number of urban wastewater treatment plants supported .....	25
PLRO051	Number of urban wastewater treatment plants built.....	25
PLRO053	Number of water treatment stations supported.....	26
PLRO057	Length of stormwater drainage network supported .....	26
PLRO061	Number of waste management facilities supported .....	26
PLRO069	Surface of protected and valuable natural sites other than Natura 2000 covered by protection and restoration measures .....	27
PLRO071	Number of supported forms of nature protection .....	27
PLRO073	Number of conducted information and education campaigns shaping environmental awareness.....	27
PLRO074	Number of nature conservation planning documents developed .....	28
PLRO128	Number of universities supported.....	28
PLRO133	Number of healthcare entities supported .....	29
PLRO134	Number of supported healthcare entities providing emergency medical services or organisational units of hospitals specialised in providing services necessary for emergency medical services .....	29
PLRO135	Length of tourist routes supported .....	30
PLRO136	Length of renewed tourist routes.....	30
PLRO137	Length of newly created tourist routes .....	31
PLRO141	Number of cultural institutions supported.....	31
PLRO144	Number of supported objects in natural heritage sites.....	31
PLRO150	Number of participants of the trainings for the institution.....	32
PLRO153	Number of meetings of committees, group networks and other meetings to exchange experiences with partners.....	32
PLRO158	Number of large scale information and promotional activities .....	33
PLRO160	Number of solutions using public sector information/private data .....	33
PLRO166	Surface of sites at risk of flooding or disaster of the water unit, which will be protected as a result of investment .....	34
PLRO171	Number of water bodies where the project implementation has contributed to the improvement of status/potential.....	34
PLRO174	Surface of reclaimed lakes/reservoirs .....	34
<b>b. Result indicators</b>	.....	35
RCR35	Population benefiting from flood protection measures.....	35
RCR50	Population benefiting from measures for air quality .....	35
RCR64	Annual users of dedicated cycling infrastructure .....	35
RCR72	Annual users of new or modernised e-health care services.....	36
RCR95	Population having access to new or improved green infrastructure .....	36
RCR96	Population benefiting from protection measures against non-climate related natural risks and risks related to human activities .....	36
PLRR023	Number of cultural events organised.....	37
PLRR042	Number of endangered species for which conservation measures have been carried out ..	37

## 1. INTRODUCTION

The Programme's performance will be measured by applying several output and result indicators from below list. Consequently, each project should define a set of indicators in order to measure the achievement of planned project's effects. There are output indicators and result indicator to be defined for each project – all of them are presented in the table below, metrics for each indicators are provided further in this document.

By choosing one of the Programme's specific objective (col. b in the table below), under which project is to be implemented, the Lead Partner is, at the same time, obliged to apply at least one of the result indicators to which that project shall contribute. Activities planned in the project and their outputs should in a logical way lead to the achievement of this result indicator – this aspect will be evaluated during formal assessment of projects' application. The project can apply more than one result indicator under addressed specific objective.

The full list of indicators applied in the Programme is divided into the Programme's indicators (col. d) – crucial for confirming the Programme's performance – these are the indicators which projects shall address primarily and additional indicators (col. e), which shall enable projects more detailed reflection of their expected impact.

### Important!

1. Project Partners **must** choose indicators for their project **only** from below list (no other indicator(s) can be included in the project);
2. In order for the project to be eligible it **must truly** contribute to **at least one** of the Programme's **output** and **one result** indicators (col. d);
3. In order to confirm its importance for the Programme, the project's should prove its **significant input to achievement of the Programme indicators**. The stronger and more convincing this input is the greater relevance of the project to the Programme.

## 2. PROGRAMME LOGFRAME

Priority [a]	Specific objective [b]	Possible actions [c]	Programme indicators [d]	Additional indicators measuring projects performance [e]
1. Environment	1.1. Promoting climate change adaptation and disaster risk prevention and resilience, taking into account eco-system based approaches	1. Joint promotion and implementation of activities related to resilience to climate change - natural disasters and fires 2. Joint actions aimed at risk prevention and resilience to other local threats and disasters caused by anthropogenic activities	<b>Output indicators:</b> RCO24. Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against natural disasters RCO81. Participations in joint actions across borders RCO116. Jointly developed solutions  <b>Result indicators:</b> RCR36. Population benefiting from wildfire protection measures RCR37. Population benefiting from protection measures against climate related natural disaster (other than flood and wildfires) RCR104. Solutions taken up or up-scaled by organisations	<b>Output indicators:</b> RCO27. National and sub-national strategies addressing climate change adaptation RCO28. Area covered by protection measures against wildfires RCO121. Area covered by protection measures against climate related natural disasters (other than floods and wildfire) RCO122. Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against non-climate related natural risks and risks related to human activities PLRO041. Number of units of rescue services equipped with rescue and disaster recovery equipment PLRO042. Number of purchased fire trucks equipped with rescue and disaster recovery equipment PLRO150. Number of participants of the trainings for the institution  <b>Result indicators:</b> RCR96. Population benefiting from protection measures against non-climate related natural risks and risks related to human activities
	1.2. Promoting access to water and sustainable water management	1. Joint actions aimed at protection and improvement of water resources' condition. 2. Joint actions aimed at development of sewage infrastructure and improving wastewater management. 3. Joint actions aimed at improvement of public water supply network.	<b>Output indicators:</b> RCO30. Length of new or upgraded pipes for the distribution systems of public water supply RCO31 Length of new or upgraded pipes for the public network for collection of waste water RCO81. Participations in joint actions across borders	<b>Output indicators:</b> PLRO050. Number of urban wastewater treatment plants supported PLRO051. Number of urban wastewater treatment plants built PLRO053. Number of water treatment stations supported PLRO057. Length of stormwater drainage network supported PLRO171. Number of water bodies where the project implementation has contributed to the improvement of status/potential PLRO174. Surface of reclaimed lakes/reservoirs

			RCO116. Jointly developed solutions  <b>Result indicators:</b> RCR41. Population connected to improved public water supply RCR42 Population connected to at least secondary public waste water treatment RCR104. Solutions taken up or up-scaled by organisations	PLRO150. Number of participants of the trainings for the institution
	1.3. Enhancing protection and preservation of nature, biodiversity and green infrastructure, including in urban areas, and reducing all forms of pollution	1. Joint actions aimed at protection, regeneration and sustainable use of valuable natural areas, with particular emphasis on cross-border areas. 2. Joint actions aimed at protection of biodiversity and environment monitoring.	<b>Output indicators:</b> RCO37. Surface of Natura 2000 sites covered by protection and restoration measures RCO81. Participations in joint actions across borders RCO116. Jointly developed solutions  <b>Result indicators:</b> RCR104. Solutions taken up or up-scaled by organisations	<b>Output indicators:</b> PLRO061. Number of waste management facilities supported PLRO069. Surface of protected and valuable natural sites other than Natura 2000 covered by protection and restoration measures PLRO071. Number of supported forms of nature protection PLRO073. Number of conducted information and education campaigns shaping environmental awareness PLRO074. Number of nature conservation planning documents developed PLRO150. Number of participants of the trainings for the institution  <b>Result indicators:</b> RCR52. Rehabilitated land used for green areas, social housing, economic or other uses PLRR042. Number of endangered species for which conservation measures have been carried out

<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>2. Health</b></p>	<p>2.1. Ensuring equal access to health care and fostering resilience of health systems, including primary care, and promoting the transition from institutional to family-based and community-based care</p>	<ol style="list-style-type: none"> <li>1. Joint actions improving access and infrastructure development of diagnostic and prophylactic tools and resources in various areas of medicine.</li> <li>2. Joint actions improving access to specialist medicine, in particular medicine related to cardiovascular diseases, cancer (development of health infrastructure, purchase of new equipment for healthcare facilities) and emergency medicine.</li> <li>3. Joint actions improving access to long-term care, especially infrastructure development for geriatric and palliative care.</li> <li>4. Joint actions preventing the occurrence and effects of adverse events such as epidemics (with particular emphasis on local phenomena).</li> <li>5. Joint actions aimed at development of digitisation in health care (including the development of telemedicine).</li> <li>6. Joint actions improving the qualifications of medical and rescue personnel.</li> </ol>	<p><b>Output indicators:</b> RCO69. Capacity of new or modernised health care facilities RCO116. Jointly developed solutions</p> <p><b>Result indicators:</b> RCR73. Annual users of new or modernised health care facilities RCR104. Solutions taken up or up-scaled by organisations</p>	<p>PLRO133. Number of medical entities supported PLRO134. Number of supported healthcare entities providing emergency medical services or organisational units of hospitals specialised in providing services necessary for emergency medical services PLRO150. Number of participants of the trainings for the institution PLRO158. Number of large scale information and promotional activities</p> <p><b>Result indicator:</b> RCR72. Annual users of new or modernised e-health care services</p>
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>3. Tourism</b></p>	<p>3.1. Enhancing the role of culture and sustainable tourism in economic development, social inclusion and social innovation</p>	<ol style="list-style-type: none"> <li>1. Joint actions aimed at protection, development and promotion of cultural heritage and services in the field of culture, including development of tourist infrastructure</li> <li>2. Joint actions aimed at promotion of natural heritage and ecotourism, including development of tourist infrastructure.</li> <li>3. Joint actions aimed at adaptation of skills and professional qualifications in the field of tourism to the needs of the tourism market and changes within.</li> </ol>	<p><b>Output indicators:</b> RCO58. Dedicated cycling infrastructure supported RCO77. Number of cultural and tourism sites supported RCO115. Public events across borders jointly organised RCO116. Jointly developed solutions</p> <p><b>Result indicators:</b> RCR77. Visitors of cultural and tourism sites supported RCR104. Solutions taken up or up-scaled by organisations</p>	<p><b>Output indicators:</b> PLRO135. Length of tourist routes supported PLRO136. Length of renewed tourist routes PLRO137. Length of newly created tourist routes PLRO141. Number of cultural institutions supported PLRO144. Number of supported objects in natural heritage sites</p> <p><b>Result indicator:</b> RCR64. Annual users of dedicated cycling infrastructure</p>

4. Cooperation	<p>4.1. Enhance efficient public administration by promoting legal and administrative cooperation and cooperation between citizens, civil society actors and institutions, in particular with a view to resolving legal and other obstacles in border regions</p>	<p>1. Increasing and improving the quality of cross-border cooperation between entities in the Programme area.</p> <p>2. Improving access to information on legal, fiscal and formal conditions related to economic and public activities in the Programme area, promoting joint activities contribution to sustainable development of private and public entities;</p> <p>3. Promoting cooperation between border services, customs services and other services related to the operation of border crossings and border management (including phytosanitary and veterinary services) by common training and improving the quality of service on border crossings, including purchase of necessary equipment .</p>	<p><b>Output indicators:</b></p> <p>RCO83. Strategies and action plans jointly developed</p> <p>RCO116. Jointly developed solutions</p> <p><b>Result indicators:</b></p> <p>RCR79. Joint strategies and action plans taken up by organisations</p> <p>RCR104. Solutions taken up or up-scaled by organisations</p>	<p><b>Output indicators:</b></p> <p>RCO14. Public institutions supported to develop digital services, products and processes</p> <p>RCO80. Community-led local development strategies supported</p> <p>PLRO010. Number of entities that published public sector information/private data on-line</p> <p>PLRO128. Number of universities supported</p> <p>PLRO150. Number of participants of the trainings for the institution</p> <p>PLRO153. Number of meetings of committees, group networks and other meetings to exchange experiences with partners</p> <p>PLRO158. Number of large scale information and promotional activities</p> <p>PLRO160. Number of solutions using public sector information/private data</p>
	<p>4.2. Build up mutual trust, in particular by encouraging people-to-people actions</p>	<p>1. Integration of residents of the Programme area through in the fields of art and culture</p> <p>2. Cross-border cooperation in education</p> <p>3. Joint bottom-up initiatives concerning the environment and climate change</p> <p>4. Integrational initiatives and capacity building in the field of healthcare and safety</p>	<p><b>Output indicators:</b></p> <p>RCO85. Participations in joint training schemes</p> <p>RCO87. Organisations cooperating across borders</p> <p>RCO115. Public events across borders jointly organised</p> <p><b>Result indicators:</b></p> <p>RCR81. Completion of joint training schemes</p> <p>RCR84. Organisations cooperating across borders after project completion</p> <p>RCR85. Participations in joint actions across borders after project completion</p>	<p><b>Output indicators:</b></p> <p>RCO80. Community-led local development strategies supported</p> <p>PLRR023. Number of cultural events organised</p> <p>PLRO073. Number of information and education campaigns shaping environmental awareness</p> <p>PLRO153. Number of meetings of committees, group networks and other meetings to exchange experiences with partners</p> <p>PLRO158. Number of large scale information and promotional activities</p>
5. Borde		<p>1. Common trainings of border services, customs services, other services related to the operation of border crossings (including phytosanitary and</p>	<p><b>Output indicators:</b></p> <p>RCO85. Participations in joint training schemes</p>	<p><b>Output indicators:</b></p> <p>RCO014. Public institutions supported to develop digital services, products and processes</p>

	<p>A safer and more secure Europe</p>	<p>veterinary services) and services ensuring security in the border area;</p> <p>2. Equipping of customs services, border services, phytosanitary and veterinary services and services ensuring security in the border area;</p> <p>3. Improving the service at existing border crossings;</p> <p>4. Promoting the creation of pedestrian and bicycle border crossings for the development of cross-border tourism;</p> <p>5. Activities related to the sealing of borders, by preventing and combating illegal migration;</p> <p>6. Securing borders beyond border crossings, e.g., by creating an innovative border supervision system using modern technology (sensors, cameras, radars, drones, etc.)</p>	<p><b>Result indicator:</b></p> <p>RCR81. Completions of joint training schemes</p>	<p>PLRO008. Number of entities supported in the development of digital services, products and processes</p> <p>PLRO150. Number of participants of the trainings for the institution</p> <p>PLRO153. Number of meetings of committees, group networks and other meetings to exchange experiences with partners</p>
--	---------------------------------------	--	---	---

### 3. PROGRAMME INDICATORS

#### a. Output indicators

RCO24 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against natural disasters

Indicator name	RCO24 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against natural disasters
Measurement unit	euro
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition	Total value of investments in projects supporting the development or upgrading of disaster monitoring, preparedness, warning and response systems linked to climate related natural risks. Upgrading should refer primarily to new functionalities or to upscaling of existing systems at national and regional levels. The indicator covers also cross-border and transnational investments in such measures / actions. The indicator covers interventions at national and regional level which are not disaster specific or which are not covered by the related common indicators for floods (RCO25) or wildfires (RCO28).
Time measurement achieved	Upon completion of output in the supported project

RCO30 Length of new or upgraded pipes for the distribution systems of public water supply

Indicator name	RCO30 Length of new or upgraded pipes for the distribution systems of public water supply
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition	The length of new or upgraded pipes for the distribution of public water supplied. Upgrading refers to significant improvements aiming at higher quality of water and/or reduction of water losses. The water pipes need to be physically completed in order to count for the achieved values. Maintenance and repairs are not covered.
Time measurement achieved	Upon completion of output in supported projects

RCO31 Length of new or upgraded pipes for the public network for collection of waste water

Indicator name	RCO31 Length of new or upgraded pipes for the public network for collection of waste water
Measurement unit	km
Type of indicator	output
Baseline	0
Priority	Environment (1.2)

(Specific objective)	
Definition	<p>Length of new or upgraded pipes for the public network for waste water collection. Upgrading refers to significant improvements aiming elimination of leakages etc. The waste water pipes need to be physically complete in order to count for the achieved values.</p> <p>The indicator also covers waste water collection network linked to storm water management.</p> <p>Maintenance and repairs are not covered.</p>
Time measurement achieved	Upon completion of output in supported projects

#### RCO37 Surface of Natura 2000 sites covered by protection and restoration measures

Indicator name	RCO37 Surface of Natura 2000 sites covered by protection and restoration measures
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition	<p>Surface area of Natura 2000 sites covered by protection and restoration measures financed by the supported projects. These measures need to be in line with the prioritised action framework (PAF).</p> <p>The PAFs are strategic multiannual planning tools aimed at providing a comprehensive overview of the measures that are needed to implement the EU-wide Natura 2000 network and linking them to the corresponding EU funding instruments.</p>
Time measurement achieved	Upon completion of output in the supported project

#### RCO58 Dedicated cycling infrastructure supported

Indicator name	RCO58 Dedicated cycling infrastructure supported
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition	<p>Length of dedicated cycling infrastructure newly built or significantly upgraded by projects supported. Dedicated cycling infrastructure includes cycling facilities separated from roads for vehicular traffic or other parts of the same road by structural means (kerbs, barriers), cycling streets, cycling tunnels, etc. For cycling infrastructure with separated oneway lanes (ex: on each side of a road), the length is measured as lane length.</p>
Time measurement achieved	Upon completion of output in the supported project

#### RCO69 Capacity of new or modernised health care facilities

Indicator name	RCO69 Capacity of new or modernised health care facilities
Measurement unit	persons/year

Type of indicator	output
Baseline	0
Priority (Specific objective)	Health (2.1)
Definition	The maximum annual number of persons that can be served by the new or modernised health care facility at least once during a period of one year. Healthcare facilities include hospitals, clinics, outpatient care centers, specialized care centers etc. Modernisation does not include energy renovation or maintenance and repairs.
Time measurement achieved	When the respective medical services of the new or modernised healthcare facility supported are operational.

#### RCO77 Number of cultural and tourism sites supported

<b>Indicator name</b>	<b>RCO77 Number of cultural and tourism sites supported</b>
Measurement unit	cultural and tourism sites
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition	Number of cultural and tourism sites supported by the Programme.
Time measurement achieved	Upon completion of output in the supported project

#### RCO81 Participations in joint actions across borders

<b>Indicator name</b>	<b>RCO81 Participations in joint actions across borders</b>
Measurement unit	participations
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1, 1.2, 1.3)
Definition	The indicator counts the number of participations in joint actions across borders implemented in the supported projects. Joint actions across borders could include, for instance, exchange activities or exchange visits organized with partners across borders. Participations (i.e. number of persons attending a joint action across borders - e.g. citizens, volunteers, students, pupils, public officials, etc.) are counted for each joint action organised on the basis of attendance lists or other relevant means of quantification. A joint action is considered as the action organised with the involvement of organizations from at least two participating countries. Participations in public events organized in supported projects should not be counted in this indicator.
Time measurement achieved	Upon project finalisation

#### RCO83 Strategies and action plans jointly developed

<b>Indicator name</b>	<b>RCO83 Strategies and action plans jointly developed</b>
-----------------------	--

Measurement unit	strategy/action plan
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1)
Definition	<p>The indicator counts the number of joint strategies or action plans developed by supported projects. A jointly developed strategy aims at establishing a targeted way to achieve a goal oriented process in a specific domain. An action plan translates an existing jointly developed strategy into actions.</p> <p>Jointly developed strategy or action plan implies the involvement of organizations from at least two participating countries.</p>
Time measurement achieved	Upon project finalisation

#### RCO85 Participations in joint training schemes

Indicator name	RCO85 Participations in joint training schemes
Measurement unit	participations
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.2), Borders (5.1)
Definition	<p>The indicator counts the number of participations in joint training schemes. Participations in a joint training schemes are intended to be counted as registered participants who started the training.</p> <p>A joint training scheme implies the involvement of organizations from at least two participating countries.</p> <p>A joint training scheme requires building knowledge in a certain topic and involves the training of participants over several sessions. A one-off meeting/event/internal session where information is disseminated should not be considered as a training scheme.</p>
Time measurement achieved	Upon project finalisation

#### RCO87 Organisations cooperating across borders

Indicator name	RCO87 Organisations cooperating across borders
Measurement unit	Organisations
Type of indicator	Output
Baseline	0
Priority (Specific objective)	Cooperation (4.2)
Definition	<p>The indicator counts the organisations cooperating formally in supported projects. The organisations counted in this indicator are the legal entities including project partners and associated organizations, as mentioned in the financing agreement of the application. Organisations cooperating formally in small projects (for instance under a Small Project Fund) are also counted.</p>
Time measurement achieved	Upon project finalisation

#### RCO115 Public events across borders jointly organised

Indicator name	RCO115 Public events across borders jointly organised
Measurement unit	events
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1), Cooperation (4.2)
Definition	<p>The indicator counts the number of events across border which were jointly organised by the partners in supported projects or by interregional programmes, and not the number of participations in public events.</p> <p>A public event across borders is understood as a joint action which has been advertised through relevant means, to the general public of the area covered by the programme.</p> <p>A joint action is considered as the action organised with the involvement of organizations from at least two participating countries.</p> <p>A public event across borders should have participants from at least two countries of the programme area.</p>
Time measurement achieved	Upon project finalisation

#### RCO116 Jointly developed solutions

Indicator name	RCO116 Jointly developed solutions
Measurement unit	solutions
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1, 1.2, 1.3), Health (2.1), Tourism (3.1), Cooperation (4.1)
Definition	<p>The indicator counts the number of jointly developed solutions from joint pilot actions implemented by supported projects. In order to be counted in the indicator, an identified solution should include indications of the actions needed for it to be taken up or to be upscaled.</p> <p>A jointly developed solution implies the involvement of organizations from at least two participating countries.</p>
Time measurement achieved	Upon project finalisation

### b. Result indicators

#### RCR36 Population benefiting from wildfire protection measures

Indicator name	RCR36 Population benefiting from wildfire protection measures
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition	Population living in areas exposed to wildfire risks and where vulnerability to wildfires decreases as a result of the supported projects. The indicator covers protection measures which are clearly localised in high risk areas

	and which address directly wildfires risks, as opposed to more general measures implemented at national or regional level.
Time measurement achieved	Upon completion of output in the supported project

RCR37 Population benefiting from protection measures against climate related natural disaster (other than flood and wildfires)

<b>Indicator name</b>	<b>RCR37 Population benefiting from protection measures against climate related natural disaster (other than flood and wildfires)</b>
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition	Population living in areas exposed to climate related natural risks, other than floods and wildfires (storms, droughts, heatwaves), and where vulnerability to such risks decreases as a result of the supported projects. The indicator covers protection measures, areas at risk and which address directly the specific risks, as opposed to more general measures implemented at national or regional level.
Time measurement achieved	Upon completion of output in the supported project

RCR41 Population connected to improved public water supply

<b>Indicator name</b>	<b>RCR41 Population connected to improved public water supply</b>
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition	Population connected to improved public water supply as a result of the implemented project. Improved water supply is interpreted in terms of access (i.e. new connections to the public water supply), higher volume of water delivered to consumers, reduction of water losses, and better quality of water. The EU standard for the quality of drinking water is defined in Council Directive 98/93/EC.
Time measurement achieved	At latest one year after the completion of output in the supported project

RCR42 Population connected to at least secondary public waste water treatment

<b>Indicator name</b>	<b>RCR42 Population connected to at least secondary public waste water treatment</b>
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.2)

Definition	Additional population connected to at least secondary public waste water treatment as a result of the supported projects (treatment plants and network extension). Secondary waste water treatment refers to the treatment of urban waste water by a process generally involving biological treatment in line with the terms of Directive 91/271/EC. The indicator can be also used by projects supporting the extension of the waste water collection network.
Time measurement achieved	At latest one year after the completion of output in the supported project

#### RCR73 Annual users of new or modernised health care facilities

Indicator name	RCR73 Annual users of new or modernised health care facilities
Measurement unit	users/year
Type of indicator	result
Baseline	0
Priority (Specific objective)	Health (2.1)
Definition	<p>Number of patients served by the new or modernised health care facility during the year after the completion of the intervention. One individual can be counted more than once if using facilities multiple times. The indicator baseline refers to the registered patients served at least once by the health care facility during the year before the start of the intervention, and it can be zero for new facilities.</p> <p>Healthcare facilities include hospitals, clinics, outpatient care centers, specialized care centers etc.</p>
Time measurement achieved	One year starting with the time when the new or modernised health care facility becomes operational.

#### RCR77 Visitors of cultural and tourism sites supported

Indicator name	RCR77 Visitors of cultural and tourism sites supported
Measurement unit	visitors/year
Type of indicator	result
Baseline	$\geq 0$
Priority (Specific objective)	Tourism (3.1)
Definition	<p>Estimated number of annual visitors of cultural and tourism sites supported. The estimation of the number of visitors should be carried out ex post one year after the completion of the intervention. The baseline of the indicator refers to the estimated annual number of visitors of the supported sites the year before the intervention starts, and it is zero for new cultural and tourism sites.</p> <p>The indicator does not cover natural sites for which an accurate estimation of number of visitors is not feasible.</p>
Time measurement achieved	One year after the completion of output in the supported project.

#### RCR79 Joint strategies and action plans taken up by organisations

Indicator name	RCR79 Joint strategies and action plans taken up by organisations
----------------	---

Measurement unit	joint strategy/action plan
Type of indicator	result
Baseline	0
Priority (Specific objective)	Cooperation (4.1)
Definition	The indicator counts the number of joint strategies and action plans (not individual actions) adopted and implemented by organisations during or after the project completion. At the time of reporting this indicator, the implementation of the joint strategy or action plan need not to be completed but effectively started. The organisations involved in take-up may or may not be direct participants in the supported project. It is not necessary that all actions identified are taken-up for a strategy/action plan to be counted in this context. The value report should be equal to or less than the value for "RCO83 Strategies and action plans jointly developed".
Time measurement achieved	Up to one year after project completion

#### RCR81 Completions of joint training schemes

Indicator name	RCR81 Completions of joint training schemes
Measurement unit	participants
Type of indicator	result
Baseline	0
Priority (Specific objective)	Cooperation (4.2), Borders (5.1)
Definition	<p>The indicator counts the number of participants completing the joint trainings schemes organised by supported projects. Completion should be documented by the training organisers either through a record of the confirmed completions or by issuing certificates of completion of the training.</p> <p>The certificates of completion do not necessarily require a previous national certification process of the issuing organisation.</p>
Time measurement achieved	At project completion

#### RCR84 Organisations cooperating across borders after project completion

Indicator name	RCR84 Organisations cooperating across borders after project completion
Measurement unit	organisations
Type of indicator	result
Baseline	0
Priority (Specific objective)	Cooperation (4.2)
Definition	The indicator counts the organisations cooperating across borders after the completion of the supported projects. The organisations are legal entities involved in project implementation, counted within RCO87. The cooperation concept should be interpreted as having a statement that the entities have a formal agreement to continue cooperation, after the end of the supported project. The cooperation agreements may be established

	during the implementation of the project or within one year after the project completion. The sustained cooperation does not have to cover the same topic as addressed by the completed project.
Time measurement achieved	During project implementation / up to one year after project completion

#### RCR85 Participations in joint actions across borders after project completion

Indicator name	RCR85 Participations in joint actions across borders after project completion
Measurement unit	participations
Type of indicator	result
Baseline	0
Priority (Specific objective)	Cooperation (4.2)
Definition	<p>The indicator counts the number of participations in joint actions across borders after the completion of the project, organised by all or some of the former partners or associated organisations within the project, as a continuation of cooperation. Joint actions across borders could include, for instance, exchange activities or exchange visits organized with participants from at least two countries of the programme area. Participations (i.e. number of persons attending a joint action across borders) are counted for each joint action organised on the basis of attendance lists or other relevant means of quantification.</p> <p>For the definition of this indicator, the joint action includes training schemes.</p>
Time measurement achieved	Up to one year after project completion

#### RCR104 Solutions taken up or up-scaled by organisations

Indicator name	RCR104 Solutions taken up or up-scaled by organisations
Measurement unit	solutions
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.1, 1.2, 1.3), Health (2.1), Tourism (3.1), Cooperation (4.1)
Definition	<p>The indicator counts the number of solutions, other than legal or administrative solutions, that are developed by supported projects and are taken up or up-scaled during the implementation of the project or within one year after project completion. The organisation adopting the solutions developed by the project may or may not be a participant in the project. The uptake / up-scaling should be documented by the adopting organisations in, for instance, strategies, action plans etc.</p>
Time measurement achieved	During project implementation / up to one year after project completion

## 4. ADDITIONAL INDICATORS

### a. Output indicators

RCO14 Public institutions supported to develop digital services, products and processes

Indicator name	RCO14 Public institutions supported to develop digital services, products and processes
Measurement unit	public institutions
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1), Borders (5.1)
Definition and concepts	<p>Number of public institutions supported to develop or upgrade significantly digital services, products and processes, for instance in the context of e-government actions. Significant upgrades cover only new functionalities.</p> <p>Public institutions include local public authorities, sub-national authorities, or other types of public authorities. The indicator does not cover municipal enterprises and public universities or research institutes.</p>
Time measurement achieved	Upon completion of output from the supported project.

RCO25 River bank and lakeshore flood protection newly built or consolidated

Indicator name	RCO25 River bank and lakeshore flood protection newly built or consolidated
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Length of riverbanks, and lakeshore protected against extreme weather events. Protection infrastructure supported should be newly built or consolidated significantly.
Time measurement achieved	Upon completion of output in the supported project

RCO26 Green infrastructure built or upgraded for adaptation to climate change

Indicator name	RCO26 Green infrastructure built or upgraded for adaptation to climate change
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Area of green infrastructure newly built or upgraded significantly in order to enhance adaptation to climate change, for instance by strengthening

	protection to floods and preventing soil erosion. Green infrastructure typically refers to trees, lawns, hedgerows, parks, fields, forests, etc. The indicator also covers blue infrastructure such as water elements, like rivers, canals, ponds, wetlands, floodplains, water treatment facilities, etc.
Time measurement achieved	Upon completion of output in the supported project

#### RCO27 National and sub-national strategies addressing climate change adaptation

<b>Indicator name</b>	<b>RCO27 National and sub-national strategies addressing climate change adaptation</b>
Measurement unit	strategies
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Number of national and sub-national (regional or local) strategies addressing climate change adaptation for which the costs are financed by the supported projects. The indicator covers strategies that are adopted. The indicator covers also strategies for water management.
Time measurement achieved	Upon completion of output in the supported project

#### RCO28 Area covered by protection measures against wildfires

<b>Indicator name</b>	<b>RCO28 Area covered by protection measures against wildfires</b>
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Surface area covered by protection measures against wildfires developed or significantly upgraded through supported projects. Significant upgrades refer, for example, to new functionalities for protection or upscaling of existing protection measures.
Time measurement achieved	Upon completion of output in the supported project

#### RCO36 Green infrastructure supported for other purposes than adaptation to climate change

<b>Indicator name</b>	<b>RCO36 Green infrastructure supported for other purposes than adaptation to climate change</b>
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	Surface area of green infrastructure newly built or significantly upgraded for other purposes than adaptation to climate change. Upgrades refer to significant improvements in existing green infrastructures eligible for support. Maintenance is excluded.

	<p>Examples of green infrastructure include biodiversity-rich parks, permeable soil cover, green walls, green roofs, green schoolyards etc. This indicator does not cover green infrastructure supported for adaptation to climate change (covered by indicator RCO26) or investments in Natura 2000 (covered by indicator RCO37).</p>
Time measurement achieved	Upon completion of output in the supported project

RCO39 Area covered by systems for monitoring air pollution installed

Indicator name	RCO39 Area covered by systems for monitoring air pollution installed
Measurement unit	air quality zones
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	<p>The indicator measures the number of air quality zones / agglomerations with one or more additional air quality monitoring stations financed through the supported projects.</p> <p>EU Clean Air Policy mandates the assessment of ambient air quality on the basis of common methods and criteria. For this purpose, Member States establish 'air quality zones and agglomerations' throughout their territory, and in each of these, air quality monitoring networks are installed. These networks can be further expanded by adding additional sampling points that comply with the methods and criteria defined in, and reported in accordance with, the Ambient Air Quality Directives (Directive 2008/50 and 2004/107). Such sampling points provide both validated and up-to-date assessment data.</p> <p>Maintenance or repair are excluded.</p>
Time measurement achieved	Upon completion of output in the supported project

RCO80 Community-led local development strategies supported

Indicator name	RCO80 Community-led local development strategies supported
Measurement unit	contributions to strategies
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1, 4.2)
Definition and concepts	Number of contributions to Community-led local development strategies by each specific objective contributing from the Funds in line with CPR Article 28 (b). The indicator values therefore measure, at specific objective level, the discrete number of financial contributions to CLLD strategies.
Time measurement achieved	Upon completion of output in of the first supported project under the territorial strategy.

RCO121 Area covered by protection measures against climate related natural disasters (other than floods and wildfire)

Indicator name	RCO121 Area covered by protection measures against climate related natural disasters (other than floods and wildfire)
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Surface area covered by protection measures against climate related risks (other than floods and wildfires) developed or significantly upgraded through supported projects (i.e. measures related to drought prevention or against the effects of excessive heat). Significant upgrades refer, for example, to new functionalities for protection or upscaling of existing protection measures.
Time measurement achieved	Upon completion of output in supported projects

RCO122 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against non-climate related natural risks and risks related to human activities

Indicator name	RCO122 Investments in new or upgraded disaster monitoring, preparedness, warning and response systems against non-climate related natural risks and risks related to human activities
Measurement unit	euro
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Total value of investments in projects supporting the development or upgrading of disaster monitoring, preparedness, warning and response systems focussed on non-climate related natural risks (i.e. volcanic or geological risks) and risks related to human activities. Upgrading should refer primarily to new functionalities or to upscaling of existing systems at

	<p>national and regional levels. The indicator covers also cross-border and transnational investments in such measures / actions.</p> <p>The indicator covers interventions at national and regional level which are not disaster specific or which are not covered by the related common indicators for natural disaster monitoring (RCO24), floods (RCO25) or wildfires (RCO28).</p>
Time measurement achieved	Upon completion of output in supported projects

PLRO008 Number of entities supported in the development of digital services, products and processes

<b>Indicator name</b>	<b>PLRO008 Number of entities supported in the development of digital services, products and processes</b>
Measurement unit	entities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Borders (5.1)
Definition and concepts	Number of institutions supported to develop or significantly upgrade digital services, products and processes in the context of e-government activities. The indicator covers entities such as institutions subordinate to or supervised by the authorities (e.g. institutes, universities).
Time measurement achieved	Upon completion of output in the supported project

PLRO010 Number of entities that published public sector information/private data on-line

<b>Indicator name</b>	<b>PLRO010 Number of entities that published public sector information/private data on-line</b>
Measurement unit	entities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1)
Definition and concepts	<p>Number of public or private sector entities that published public sector information or private data online as a result of the intervention.</p> <p>Public sector information should be understood as:</p> <ul style="list-style-type: none"> <li>- public sector information within the meaning of the Act of 25<sup>th</sup> February 2016 on the re-use of public sector information,</li> <li>- public sector information within the meaning of Directive 2003/98/EC of 17<sup>th</sup> November 2003 on the re-use of public sector information (as amended by Directive 2013/37/EU amending Directive 2003/98/EC of 17<sup>th</sup> November 2003 on the re-use of public sector information).</li> </ul> <p>Private data is any content or part thereof, irrespective of the means of fixation, in particular in paper, electronic, audio, visual or audio-visual form, held and produced by an entity other than the obligated entity, with the exception of personal data. The obliged entity shall be understood as the entities listed in Article 3 of the Act on Re-use of Public Sector Information.</p>

Time measurement achieved	Upon completion of output in the supported project
---------------------------	--

PLRO041 Number of units of rescue services equipped with rescue and disaster recovery equipment

Indicator name	PLRO041 Number of units of rescue services equipped with rescue and disaster recovery equipment
Measurement unit	units
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	<p>The indicator measures the number of units of rescue service equipped with rescue and disaster recovery equipment under the implemented projects.</p> <p>Units of rescue service – fire protection units (organisational units of the State Fire Service; organisational units of the Military Fire Protection; company fire brigade; company rescue service; municipal professional fire brigade; district (city) professional fire brigade; field rescue service; volunteer fire brigade; association of volunteer fire brigades; other rescue units), other services, inspections, guards, institutions and entities that voluntarily, by means of a civil law agreement, agreed to cooperate in rescue actions, belonging to the National Rescue and Firefighting System.</p> <p>Measurement method: count the number of units of rescue service that have been equipped with rescue and disaster recovery equipment under the implemented projects. Equipment for firefighting, technical rescue, chemical rescue, environmental rescue, radiation rescue, human rescue, animal rescue, water rescue, medical rescue, altitude rescue should be taken into account.</p> <p>Special cases during the measurement: each rescue service unit can only be counted once for the index even if it purchases several units of equipment or vehicles.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO042 Number of purchased fire trucks equipped with rescue and disaster recovery equipment

Indicator name	PLRO042 Number of purchased fire trucks equipped with rescue and disaster recovery equipment
Measurement unit	fire tracks
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	<p>The indicator measures the number of purchased fire trucks equipped with rescue and disaster recovery equipment by the emergency services unit.</p> <p>Fire truck (vehicle) – a specially marked vehicle equipped to carry out rescue and disaster recovery operations.</p> <p>Measurement method: the number of purchased fire trucks equipped with rescue and disaster recovery equipment by the emergency services unit</p>

	<p>should be counted. Vehicles for firefighting activities in combination with other activities should be counted in the indicator (the condition for a vehicle to be counted in the indicator is that it can carry out firefighting activities).</p> <p>Special cases during measurement:</p> <ul style="list-style-type: none"> <li>- the following should be included in the value of the indicator: reconnaissance and rescue vehicles, rescue and fire-fighting vehicles, vehicles with a mechanical ladder or hydraulic jack,</li> <li>- the following should not be included in the indicator value: operational cars, minibuses and buses for the transport of rescuers, supply cars and cars for water rescue, technical rescue, search and rescue, technical support.</li> </ul>
Time measurement achieved	Upon completion of output in the supported project

#### PLRO050 Number of urban wastewater treatment plants supported

Indicator name	PLRO050 Number of urban wastewater treatment plants supported
Measurement unit	wastewater treatment plants
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	The indicator measures the number of wastewater treatment plants constructed, extended, converted or upgraded as a result of the project.
Time measurement achieved	Upon completion of output in the supported project

#### PLRO051 Number of urban wastewater treatment plants built

Indicator name	PLRO051 Number of urban wastewater treatment plants built
Measurement unit	wastewater treatment plants
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	<p>The indicator measures the number of urban wastewater treatment plants that have been built as a result of the project.</p> <p>The construction of a wastewater treatment plant should be understood as a facility built from scratch or adapted for the purpose of a wastewater treatment plant, which had a different functional character before the adaptation.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO053 Number of water treatment stations supported

Indicator name	PLRO053 Number of water treatment stations supported
Measurement unit	water treatment stations
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	The indicator measures the number of water treatment stations that have been built, extended or rebuilt as part of completed projects. Water treatment plant – a set of basic technological facilities directly serving the process of water treatment, i.e. bringing contaminated water to the state of purity required for a given application.
Time measurement achieved	Upon completion of output in the supported project

PLRO057 Length of stormwater drainage network supported

Indicator name	PLRO057 Length of stormwater drainage network supported
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	The indicator measures the total length of stormwater drainage network built or extended/upgraded as part of the project, together with fixtures and fittings, through which rainwater or snowmelt is discharged, owned by the water and sewerage company. Rainwater or snowmelt, contained in open or closed sewerage systems, must originate from contaminated surfaces with a hardened surface, in particular from cities, ports, airports, industrial, commercial, service and storage areas, transport bases and roads and car parks.
Time measurement achieved	Upon completion of output in the supported project

PLRO061 Number of waste management facilities supported

Indicator name	PLRO061 Number of waste management facilities supported
Measurement unit	waste management facilities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	The indicator measures the number of waste management facilities built, rebuilt or equipped as a result of the project. Facility is understood as one or more installations together with the land to which the operator holds the legal title and the equipment located thereon. Reconstruction is understood as investment works consisting in reconstruction or extension of existing facilities together with waste management equipment, performing the same function.

Time measurement achieved	Upon completion of output in the supported project
---------------------------	--

PLRO069 Surface of protected and valuable natural sites other than Natura 2000 covered by protection and restoration measures

Indicator name	PLRO069 Surface of protected and valuable natural sites other than Natura 2000 covered by protection and restoration measures
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	The indicator measures the surface of protected areas other than Natura 2000 where conservation and restoration activities will be carried out.
Time measurement achieved	Upon completion of output in the supported project

PLRO071 Number of supported forms of nature protection

Indicator name	PLRO071 Number of supported forms of nature protection
Measurement unit	forms of nature protection
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	<p>The indicator measures the number of supported forms of nature protection that have been revitalised, preserved, protected, conserved, restored or equipped.</p> <p>Forms of nature protection:</p> <ol style="list-style-type: none"> <li>1) national parks;</li> <li>2) nature reserves;</li> <li>3) landscape parks;</li> <li>4) protected landscape areas;</li> <li>5) Natura 2000 areas;</li> <li>6) nature monuments;</li> <li>7) documentation sites;</li> <li>8) ecological utilities;</li> <li>9) nature and landscape complexes;</li> <li>10) protection of plant, animal and fungi species.</li> </ol>
Time measurement achieved	Upon completion of output in the supported project

PLRO073 Number of conducted information and education campaigns shaping environmental awareness

Indicator name	PLRO073 Number of conducted information and education campaigns shaping environmental awareness
Measurement unit	information and education campaigns
Type of indicator	output
Baseline	0

Priority (Specific objective)	Environment (1.3), Cooperation (4.2)
Definition and concepts	The indicator measures the number of activities related to the transfer of knowledge, information, education and promotion of environmental attitudes and behaviour in society.
Time measurement achieved	Upon completion of output in the supported project

PLRO074 Number of nature conservation planning documents developed

Indicator name	PLRO074 Number of nature conservation planning documents developed
Measurement unit	planning documents
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	The indicator measures the number of prepared or updated planning documents resulting from the provisions of the Nature Conservation Act. To achieve the indicator it is sufficient to prepare a draft document.
Time measurement achieved	Upon completion of output in the supported project

PLRO128 Number of universities supported

Indicator name	PLRO128 Number of universities supported
Measurement unit	universities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1)
Definition and concepts	<p>The indicator measures the number of higher education institutions (universities) which received support for construction, reconstruction or extension of infrastructure and for equipment as a result of project implementation. Infrastructure of higher education institutions (HEI) should be understood as buildings used for teaching and scientific purposes, research and teaching laboratories, halls, halls of residence, specialist laboratories, including computer laboratories, as well as sports infrastructure and facilities of social and educational infrastructure (e.g. dormitories, boarding schools, canteens, student dormitories).</p> <p>The indicator covers public and non-public HEIs. Definition of HEIs in accordance with the Act of 20<sup>th</sup> July 2018 on Higher Education and Science. At programme level, a HEI is counted only once, regardless of the number of projects and types of support.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO133 Number of healthcare entities supported

Indicator name	PLRO133 Number of healthcare entities supported
Measurement unit	healthcare entities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Health (2.1)
Definition and concepts	<p>The indicator measures the number of healthcare entities covered by construction works or equipped with medical, technical equipment and/or covered by e-health investments necessary to provide medical services.</p> <p>The indicator should count:</p> <ol style="list-style-type: none"> <li>1) healthcare entities equipped (including e-health infrastructure);</li> <li>2) healthcare entities in which construction works have been carried out;</li> <li>3) equipped healthcare entities (including e-health infrastructure) where construction works have been carried out.</li> </ol> <p>The indicator does not include medical entities operating in the emergency medical services system.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO134 Number of supported healthcare entities providing emergency medical services or organisational units of hospitals specialised in providing services necessary for emergency medical services

Indicator name	PLRO134 Number of supported healthcare entities providing emergency medical services or organisational units of hospitals specialised in providing services necessary for emergency medical services
Measurement unit	healthcare entities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Health (2.1)
Definition and concepts	<p>Number of healthcare entities operating in the emergency medical services system to be covered by support.</p> <p>Measuring method of the indicator value: The indicator will indicate the number of all entities that have received co-financing within the framework of support for emergency medical services infrastructure. The indicator refers to healthcare entities covered by construction works or equipped with medical, technical equipment and/or covered by e-health investments necessary to provide medical services. The indicator counts:</p> <ul style="list-style-type: none"> <li>- healthcare entities equipped (including e-health infrastructure),</li> <li>- healthcare entities in which construction works have been carried out,</li> <li>- healthcare entities equipped (including e-health infrastructure) where construction works have been carried out.</li> </ul>
Time measurement achieved	Upon completion of output in the supported project

PLRO135 Length of tourist routes supported

Indicator name	PLRO135 Length of tourist routes supported
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition and concepts	<p>The indicator measures the length of renovated or created tourist routes. A tourist route is a route marked out in the field for excursions, marked with uniform signs (symbols) and equipped with information devices which ensure safe and quiet passage for tourists of any level of skill and experience, at any time of the year and in any weather conditions, unless specific requirements stipulate otherwise (periodic closure in case of adverse weather conditions or for natural reasons in protected areas).</p> <p>A distinction is made between the following types of tourist routes:</p> <ul style="list-style-type: none"> <li>- mountain and lowland hiking, as well as walking, nature and nature paths,</li> <li>- skiing,</li> <li>- cycling,</li> <li>- canoeing,</li> <li>- equestrian.</li> </ul>
Time measurement achieved	Upon completion of output in the supported project

PLRO136 Length of renewed tourist routes

Indicator name	PLRO136 Length of renewed tourist routes
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition and concepts	<p>The indicator measures the length of renovated tourist routes. A tourist route is a route marked out in the field for excursions, marked with uniform signs (symbols) and equipped with information devices which ensure safe and quiet passage for tourists of any level of skill and experience, at any time of the year and in any weather conditions, unless specific requirements stipulate otherwise (periodic closure in case of adverse weather conditions or for natural reasons in protected areas).</p> <p>A distinction is made between the following types of tourist routes:</p> <ul style="list-style-type: none"> <li>- mountain and lowland hiking, as well as walking, nature and nature paths,</li> <li>- skiing,</li> <li>- cycling,</li> <li>- canoeing,</li> <li>- equestrian.</li> </ul>
Time measurement achieved	Upon completion of output in the supported project

PLRO137 Length of newly created tourist routes

Indicator name	PLRO137 Length of newly created tourist routes
Measurement unit	km
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition and concepts	<p>The indicator measures the length of created tourist routes.</p> <p>A tourist route is a route marked out in the field for excursions, marked with uniform signs (symbols) and equipped with information devices which ensure safe and quiet passage for tourists of any level of skill and experience, at any time of the year and in any weather conditions, unless specific requirements stipulate otherwise (periodic closure in case of adverse weather conditions or for natural reasons in protected areas).</p> <p>A distinction is made between the following types of tourist routes:</p> <ul style="list-style-type: none"> <li>- mountain and lowland hiking, as well as walking, nature and nature paths,</li> <li>- skiing,</li> <li>- cycling,</li> <li>- canoeing,</li> <li>- equestrian.</li> </ul>
Time measurement achieved	Upon completion of output in the supported project

PLRO141 Number of cultural institutions supported

Indicator name	PLRO141 Number of cultural institutions supported
Measurement unit	cultural institutions
Type of indicator	output
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition and concepts	<p>Number of cultural institutions that received support for the construction, expansion, modernisation of facilities or purchase of equipment.</p> <p>Cultural institution – an establishment of a public nature dealing with the dissemination of culture, it can be both state and local governmental, which takes various forms of organisation, e.g. theatre, cinema, film institution, museum, library, opera, operetta, philharmonic, orchestra, cultural house, arts campfire, art gallery, research and documentation centre.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO144 Number of supported objects in natural heritage sites

Indicator name	PLRO144 Number of supported objects in natural heritage sites
Measurement unit	objects
Type of indicator	output
Baseline	0
Priority	Tourism (3.1)

(Specific objective)	
Definition and concepts	<p>The indicator measures the number of objects at sites with natural heritage features that have been preserved, protected against hazards, conserved, restored, rehabilitated or equipped.</p> <p>Natural heritage – natural monuments – formed by biological or physical formations representing exceptional universal aesthetic or scientific value; geological and physiographic formations providing habitat for endangered animal and plant species of exceptional universal value from the point of view of science or their preservation; sites or zones with well-defined boundaries of exceptional universal value from the point of view of science or the preservation of natural beauty.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO150 Number of participants of the trainings for the institution

Indicator name	PLRO150 Number of participants of the trainings for the institution
Measurement unit	participants
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1, 1.2, 1.3), Health (2.1)
Definition and concepts	<p>When calculating the value of the indicator, all participants of all training forms carried out for employees of the institution (i.e. trainings, workshops, seminars, courses, studies, webinars, etc.) financed by Technical Assistance (TA) funds should be added up.</p> <p>A person should be counted as many times as training courses attended. The indicator is counted once at the time of the first payment for a training form.</p> <p>Certificates/diplomas or other documents confirming individual participation in a training form (or a certified photocopy thereof) are kept by the beneficiary and made available to the project controllers.</p> <p>By "institutions" are understood the institutions functioning in the system of implementation of the cohesion policy in the years 2021-2027 in Poland, i.e. e.g. Managing Authorities, Intermediate Bodies, Audit Institution.</p> <p>The indicator does not include no-cost training forms in the organisation of which no expenses are incurred.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO153 Number of meetings of committees, group networks and other meetings to exchange experiences with partners

Indicator name	PLRO153 Number of meetings of committees, group networks and other meetings to exchange experiences with partners
Measurement unit	meetings
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1, 4.2), Borders (5.1)

Definition and concepts	In the calculation of the indicator, the number of organised meetings of thematic networks, working groups, committees and other bodies involving partners that are financed by the TA of the programme should be added up.
Time measurement achieved	Upon completion of output in the supported project

PLRO158 Number of large scale information and promotional activities

<b>Indicator name</b>	<b>PLRO158 Number of large scale information and promotional activities</b>
Measurement unit	information and promotional activities
Type of indicator	output
Baseline	0
Priority (Specific objective)	Health (2.1), Cooperation (4.1, 4.2)
Definition and concepts	Number of conducted large scale information-promotional campaigns promoting the European Funds, i.e. addressed to a minimum of 2 target groups (including the public) and using a minimum of 4 communication tools, with all activities under the campaign being coherent and carried out under a common message.
Time measurement achieved	Upon completion of output in the supported project

PLRO160 Number of solutions using public sector information/private data

<b>Indicator name</b>	<b>PLRO160 Number of solutions using public sector information/private data</b>
Measurement unit	solutions
Type of indicator	output
Baseline	0
Priority (Specific objective)	Cooperation (4.1)
Definition and concepts	<p>Number of solutions / products (initiatives taken) aimed at using shared public sector or private data, as well as promoting and supporting data sharing.</p> <p>Actions that may be implemented include:          developing e-services based on open data, activities supporting the use and analytics of data (by enterprises), developing data exchange infrastructure – creating platforms and partnerships for collecting and exchanging data between enterprises as tools supporting data sharing, increasing G2B and B2G data exchange, including on the basis of the public interest rationale, stimulating the re-use of data (in enterprises) and increasing the supply of data with high exploitation potential.</p>
Time measurement achieved	Upon completion of output in the supported project

PLRO166 Surface of sites at risk of flooding or disaster of the water unit, which will be protected as a result of investment

<b>Indicator name</b>	<b>PLRO166 Surface of sites at risk of flooding or disaster of the water unit, which will be protected as a result of investment</b>
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Area covered by flood protection measures newly built or substantially modernised as part of supported projects.
Time measurement achieved	Upon completion of output in the supported project

PLRO171 Number of water bodies where the project implementation has contributed to the improvement of status/potential

<b>Indicator name</b>	<b>PLRO171 Number of water bodies where the project implementation has contributed to the improvement of status/potential</b>
Measurement unit	water bodies
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	The impact of the project on the improvement of the status/potential of surface water bodies will be assessed – for the purpose of the indicator, the number of water bodies where the project has contributed to the improvement of the potential should be given.
Time measurement achieved	Upon completion of output in the supported project

PLRO174 Surface of reclaimed lakes/reservoirs

<b>Indicator name</b>	<b>PLRO174 Surface of reclaimed lakes/reservoirs</b>
Measurement unit	hectares
Type of indicator	output
Baseline	0
Priority (Specific objective)	Environment (1.2)
Definition and concepts	Surface of lakes and artificial reservoirs that have been reclaimed by projects supported.
Time measurement achieved	Upon completion of output in the supported project

## b. Result indicators

### RCR35 Population benefiting from flood protection measures

Indicator name	RCR35 Population benefiting from flood protection measures
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Population living in areas where protection infrastructure (including also green infrastructure for adaptation to climate change) is built or significantly upgraded in order to reduce vulnerability to flood risks. The indicator counts the resident population at risk of flooding.
Time measurement achieved	Upon completion of output in the supported project

### RCR50 Population benefiting from measures for air quality

Indicator name	RCR50 Population benefiting from measures for air quality
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	Population living or working in treated areas with an improved air quality. Measures for improving air quality can include, for example, green infrastructure, cleaner public transport, redirection of traffic, etc. The measurement of air quality should be performed over a period of one year. The population can be estimated ex-post based, for example, on maps for air quality. Improved air quality should be interpreted in line with the terms of Directive 2008/50/EC, and it should be documented based on monitoring systems and stations for air quality.
Time measurement achieved	One year after the completion of output in the supported project

### RCR64 Annual users of dedicated cycling infrastructure

Indicator name	RCR64 Annual users of dedicated cycling infrastructure
Measurement unit	users/year
Type of indicator	result
Baseline	0
Priority (Specific objective)	Tourism (3.1)
Definition and concepts	Annual users of dedicated cycling infrastructure financed by supported projects. For the definition of dedicated cycling infrastructure see indicator RCO58. The baseline of the indicator is estimated as the annual number of users of the infrastructure for the year before the intervention starts, and it is zero for new infrastructure. The achieved values are estimated ex-post in

	terms of the number of users using the infrastructure for the year after the physical completion of the intervention.
Time measurement achieved	One year after the completion of output in the supported project

#### RCR72 Annual users of new or modernised e-health care services

Indicator name	RCR72 Annual users of new or modernised e-health care services
Measurement unit	users/year
Type of indicator	result
Baseline	>=0
Priority (Specific objective)	Health (2.1)
Definition and concepts	Annual number of registered unique users of the e-health care services newly created or modernised. Modernised services are to be considered in terms of new significant functionalities offered to the users. The achieved number of users is to be calculated over a period of one year after the completion of the intervention. The indicator baseline refers to the number of users during the year before the intervention starts, and it is zero for services newly created.
Time measurement achieved	One year after the completion of output in the supported project

#### RCR95 Population having access to new or improved green infrastructure

Indicator name	RCR95 Population having access to new or improved green infrastructure
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	Estimated population living within a 2 km radius from the public green infrastructure built or significantly upgraded in urban areas and supported by the projects.
Time measurement achieved	Upon completion of output in the supported project

#### RCR96 Population benefiting from protection measures against non-climate related natural risks and risks related to human activities

Indicator name	RCR96 Population benefiting from protection measures against non-climate related natural risks and risks related to human activities
Measurement unit	persons
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.1)
Definition and concepts	Population living in areas exposed to non-climate related natural risks and risks related to human activities, and where vulnerability to such risks decreases as a result of the supported projects. The indicator covers protection measures which are clearly localised in high risk areas and

	which address directly the specific risks, as opposed to more general measures implemented at national or regional level.
Time measurement achieved	Upon completion of output in the supported project

PLRR023 Number of cultural events organised

Indicator name	PLRR023 Number of cultural events organised
Measurement unit	cultural events
Type of indicator	result
Baseline	0
Priority (Specific objective)	Cooperation (4.2)
Definition and concepts	Number of events (cultural, artistic, interdisciplinary events, exhibitions, etc.) that have been organised by the supported institutions during the implementation of the project. The indicator also includes events organised online.
Time measurement achieved	Upon completion of output in the supported project

PLRR042 Number of endangered species for which conservation measures have been carried out

Indicator name	PLRR042 Number of endangered species for which conservation measures have been carried out
Measurement unit	endangered species
Type of indicator	result
Baseline	0
Priority (Specific objective)	Environment (1.3)
Definition and concepts	The indicator measures the number of endangered species of European or national concern that have been subject to conservation action. Conservation measures should be in accordance with the relevant Plan of Protective Tasks/Protection Plan/Species Protection Plan.
Time measurement achieved	Upon completion of output in the supported project
